

FIG. 1

### DOT'S WHAT'S MISSING

Who would believe it? You know those little dots on our schematics that indicate whether or not there is a connection between two intersecting lines? Well, it seems that one of those dots decided to pack it in early, leaving Fig. 1 of the Alpha/Meditation Goggle story (**Radio-Electronics**, April 1989) with a definite dot deficiency.

The missing dot belongs at the intersection of R3, C2, and pins 2 and 6 of IC1. We have reprinted a portion of the original schematic, along with the correction, in Fig. 1 above.—*Editor* **R-E**
